

-	1. The first layer is a thin layer of substrate material, such as glass or plastic, which is coated with a thin layer of insulating material, such as silicon dioxide or aluminum oxide.	TOTAL	1.0000
-	2. The second layer is a thin layer of substrate material, such as glass or plastic, which is coated with a thin layer of insulating material, such as silicon dioxide or aluminum oxide.	TOTAL	1.0000
-	3. The third layer is a thin layer of substrate material, such as glass or plastic, which is coated with a thin layer of insulating material, such as silicon dioxide or aluminum oxide.	TOTAL	1.0000

4. The fourth layer is a thin layer of
substrate material, such as glass or plastic,
which is coated with a thin layer of
insulating material, such as silicon dioxide
or aluminum oxide.

5. The fifth layer is a thin layer of
substrate material, such as glass or plastic,
which is coated with a thin layer of
insulating material, such as silicon dioxide
or aluminum oxide.

6. The sixth layer is a thin layer of
substrate material, such as glass or plastic,
which is coated with a thin layer of
insulating material, such as silicon dioxide
or aluminum oxide.

7. The seventh layer is a thin layer of
substrate material, such as glass or plastic,
which is coated with a thin layer of
insulating material, such as silicon dioxide
or aluminum oxide.

8. The eighth layer is a thin layer of
substrate material, such as glass or plastic,
which is coated with a thin layer of
insulating material, such as silicon dioxide
or aluminum oxide.

9. The ninth layer is a thin layer of
substrate material, such as glass or plastic,
which is coated with a thin layer of
insulating material, such as silicon dioxide
or aluminum oxide.

10. The tenth layer is a thin layer of
substrate material, such as glass or plastic,
which is coated with a thin layer of
insulating material, such as silicon dioxide
or aluminum oxide.
